OptaSense®

Traffic Monitoring Solution

1. Convert roadside optical fibre into a traffic sensor
2. Each OptaSense installation can monitor up to 80km
3. Fibre-optic sensing technology creates an array of intelligent sensors
4. Detecting passing traffic along the entire monitored road
5. Delivering highly accurate and timely traffic flow indicators
6. Providing better information for traffic engineers and road users

- Efficient route coverage
- Proven accuracy
- Ultra low maintenance
- Simple installation
- Impervious to weather, road maintenance, wear and renewals
