

## OptaSense DxS Browser Visualisation Software

*“OptaSense DxS Browser v2.16 now includes an exciting new tool which provides users with the ability to listen to the audio content of their data, to provide further insight to enhance their analysis.”*

- DxS Browser Development Team

- **WAV Exporter and Audio Tool** – allows the data from a selected channel of DAS data to be exported to WAV format, for replay outside of DxS in standard audio tools; and, in addition, provides a preview audio capability within DxS.

- The release also includes usability enhancements and minor bug fixes.

Please contact your account manager for a download link for DXS 2.16 for Windows™.
